Pöppelmann

Pöppelmann KAPSTO® – Plastic protective caps and plugs for every application. Our KAPSTO® protective caps and plugs ensure optimum protection during production, storage and transport. Every protection element of our KAPSTO® standard program with over 3,000 versions perfectly protects your application. – All individually tailored according to your requirements. Whether robust, low-abrasion, temperature resistant or sealing – you will find the right protective element here.

Anorom

The ANOROM factory specializes in surface treatments for aluminum parts: decorative anodizing, hard anodizing, SURTEC 650 chroming. We have the ability to treat aluminum parts with dimensions up to 2700 mmx1000 mm and a weight of 350 kg/piece. We address the automotive industry, the aeronautical industry, the military industry, the electronic and telecommunications industry, the medical and pharmaceutical industry, the processing industry.

4M MP

+ 25 years experience in plastic injection or blow moulding for automotive and other industries. Our dedication to the quality of the products and services we deliver represents the foundation of our success.

Werth Magyarország

Werth Magyarország Kft., celebrating its 15th anniversary in 2025, is a leading Hungarian metrology company established in 2010. Representing six globally recognized manufacturers – Werth, Aberlink, Creaform, Metrologic, TZTEK, and Unicomp – the company combines decades of expertise with continuous innovation. Headquartered in Monor, it serves more than 1,700 corporate partners and over 4,500 customers in Hungary and abroad, and has delivered more than 200 successful trainings. Its portfolio includes high-accuracy coordinate measuring machines, optical and multi-sensor systems, industrial CT solutions, portable 3D scanners, and platform-independent 3D metrology software. These solutions support applications ranging from production monitoring to laboratory inspection, quality control, reverse engineering, and automated processes. Committed to excellence, Werth Magyarország provides comprehensive service and tailored professional training, helping customers achieve efficient, precise, and cost-effective production.

Digital Romania

Digital Romania is a marketplace for IT and Software solutions, focusing on the Romanian market. We help software companies to promote and sell their solutions. We help Romanian companies to digitalize their business. Our main services for IT Software Companies are: sales consulting, digital marketing, lead generation, external sales. Our main digitalization services are: digitalization strategy, audit, supplier evaluation and selection, support in implementation.

ACAROM

ACAROM (Romania Automobile Manufacturers Association) is a professional and employer organization of companies in Romania's automotive industry. Founded in 1996 and recognized as a public utility in 2020, its members are involved in designing, manufacturing, and selling vehicles, parts, and materials, as well as providing related services and equipment. The main goal is to represent the interests of the automotive sector in Romania.

E-Cablaje

E-Cablaje is one of the main Romanian producers of electrical cables, control cables, brake and clutch, for motor vehicle, cords and leads, insulated, electric, with moulded-on plugs, cable assemblies, wiring harnesses/looms and cable connector assemblies.

Scherdel

We are an internationally active company with many years of experience in the development and manufacturing of technically sophisticated components and system solutions. Our partnerships are built on quality, innovation and open communication.

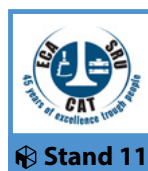

SAC Group

SAC Group manufacture and supply mechanical parts worldwide. Turning, milling, stamping, forging, casting, and cold forming are our specialized areas. We also have welding, soldering and a modern assembly line in-house. With manufacturing operations, warehouses and sales offices in Sweden, China, Poland, Hungary, Czech Rep., Estonia and the support of our logistics partners, SAC are to increase the efficiency and competitiveness of its' customers in the wide industrial space. SAC Group – Your key to low cost and success

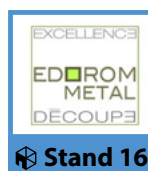

InTradeFairs

Intradefairs is an online B2B platform for industrial companies, the organizer in Romania of the Industry Expo, Automotive Expo, Manufacturing Expo, Emsetech Expo, Logistics Expo Technology Expo, Electronics Expo, Robotics Expo and Automation Expo Trade Fairs.

Elemente Comanda Auto

Having over 45 years of experience in the automotive industry, the Componente Auto Group recommends itself as a reliable partner, both for the original equipment market (OEM) and for the spare part one, by its activity of design, development and manufacture of parts and assemblies.

Edorom Metal

The main activity of EDOROM METAL company is cold plastic deformation, including the following processes: stamping, cutting / punching, progressive stamping and press assembly. Our equipment: automatic presses with a capacity between 40 and 400 Tt.

CED Central European Economic Development Network Nonprofit

CED Central European Economic Development Network Nonprofit Ltd. is the Hungarian Government's dedicated institution responsible for export promotion in Central Europe. Our objective is to foster and support the Hungarian manufacturers and service providers to enter foreign markets in the CE region, thereby increasing Hungarian export volume and the economic competitiveness of this region. With 20 offices in the neighbouring countries of Hungary plus Czechia and Poland and with 13 offices nationwide, CED has an overall picture of business demand and supply in the Central European region.

NOVUM Informatikai

NOVUM IT is a Hungarian software development team that develops software for CNC users. Our main software products are CNC simulators, of which we have developed more than 100 in recent years. We have good references with global companies worldwide. Simulators are indispensable tools, for example, in the case of highly complex machine tools with very large workspaces, on which small series of high-value parts are produced. We are capable of performing any custom software development.

PQ Plast

PQ = Precision & Quality 1966: Gentner GmbH was founded - german family business. Constant improvement of the quality policy, trust towards customers leads to satisfied customers and long relationships. 2011: PQ-Plast SRL/Arad was founded. TODAY: more freedom, more responsibility. PQ-PLAST creates high-quality technical and functional plastic systems. Our know-how: development, tool making, injection molding, assembly, leathering & painting. Established processes: fully automated, fully controlled, traceability, environmental awareness, and ... german reliability in Romania. "WE CANNOT BE AVERAGE!"

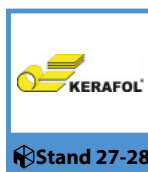

GEMTECH

GEMTECH is a highly dynamic, 100% privately owned, Hungarian industrial company specialising in steel structures and machinery manufacturing. Since its founding in 2009, the company has been fully committed to delivering premium-quality services that meet the demands of both domestic and international markets. With over 30,000 m² of enclosed, crane-equipped industrial halls, state-of-the-art technological infrastructure, and a team of highly qualified professionals, our company is a leading player in the fields of steel structure and machinery manufacturing, as well as construction. Our goal is for GEMTECH Ltd. to become a leading industrial company in the Central and Eastern European region, offering complex, premium quality solutions built on cutting-edge technologies, engineering expertise, and a dedicated team of professionals. Our vision is for the name GEMTECH to stand for quality, reliability, and professional excellence – both in Hungary and on the international stage. Total industrial area: 130,000 m²; Production halls: 30,000+ m²; Annual production capacity: 20,000+ tons; Maximum lifting capacity: 150 tons / 40 meters; Permanent staff: 250+ employees.

Transilvania Business

Monthly magazine Transilvania Business is the sole premium publication mainly focused on economic activities in Transylvania and Banat – Romania, but also integrates articles about main national investments and projects and also international trends & events.

KERAFOL Keramische Folien

Kerafol Keramische Folien. The family-run company KERAFOL® specializes in thermal management and technical ceramics. Thanks to our decades of experience and state-of-the-art process technology, we develop and manufacture high-quality technical products for various markets. KERAFOL® is the specialist for all aspects of thermal management. With almost 300 employees, we are involved in the development and production of thermal interface materials (KERATHERM®) and thermally conductive injection-molded granules (KERAMOLD®). In line with the motto "KERAFOL® makes electronics cool", KERAFOL® products have been used in electronic assemblies for many years, and the electrification of the drive train in the mobility sector has led to many other new areas of application. Thanks to many years of experience in the field of polymer technology and working with ceramic fillers, our experts in R&D and application engineering develop high-performance, innovative and sustainable solutions, also on customer request. Strict internal quality guidelines, modern processes and intelligent production planning make KERAFOL® a reliable partner and loyal supplier.

Mora IPR

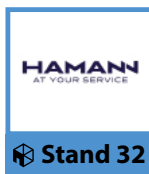

Mora IPR from Mediaș is part of the Mora International group, being an experienced manufacturer in the injection of thermoplastic material products, for various industries, especially the automotive industry. Our experience allows us to simplify and implement plastic injection parts projects, even the most complex ones. The experience of the Mora IPR Mediaș team, in the injection of plastic parts, is at a high level, both for technical parts and for decorative parts. The experience in the injection process is complemented by the assembly department where there is expertise for:

- Insertion of metal inserts
- Pad printing
- Ultrasonic welding
- Manual, automatic and semi-automatic assembly
- Different control systems depending on the application.

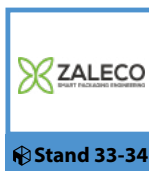

Romcrete Echipamente

Romcrete Echipamente is an authorized Graco distributor and service partner in Romania, providing complete solutions for automotive suppliers, repair, and maintenance processes. Our expertise covers a wide range of fluid handling, sealing, coating, and surface treatment applications, ensuring precision and consistency in every step of the workflow. We supply and maintain professional Graco systems for sealants, adhesives, paints, lubricants, and other industrial materials, used in assembly lines, component manufacturing, and finishing. With a strong technical background and field experience, we support our clients through on-site demonstrations, training, and customized equipment setup, ensuring each system performs at maximum efficiency. Romcrete Echipamente is committed to reliability, innovation, and customer support — helping professionals optimize their operations through advanced, durable, and easy-to-maintain Graco equipment.

Hamann

Hamann imports and distributes products specific to manufacturing processes, maintenance activities in the industrial sector and those who perform maintenance and repair work for cars, trucks or agricultural machinery.

Zaleco

We, at Zaleco, have grown into more than just a packaging company; we are a community of inspiring people, bound by the entrepreneurial spirit, and empowered to make a difference. We understand that creating a packaging solution is not just about encasing a product; it's about wrapping up a brighter, more sustainable future for generations to come. From sourcing ethical materials to implementing energy-efficient manufacturing processes, our commitment to bettering the planet is unwavering. As we look to the future, we are excited to continue our journey with you. Let's grow together, shaping a landscape filled with not just packages, but promises—promises of quality, integrity, and a sustainable world. Thank you for trusting us to be a part of your story!

Bora SPA

Bora company was established in 1975 and has always been working in the sheet metal stamping industry, for Automotive and Home Appliances markets. We have a long experience, over 50 years, in designing and manufacturing of die tools, sheet metal stamping and we have developed lately FEM Analysis and simulation of stamping process. Today, we can provide our customers with co-design, prototyping, small assemblies and welding, too. We have two production plants, in Italy and Poland, for sheet metal stamping with progressive and transfer presses up to 2500 tons. Both plants are certified ISO 9001:2015, ISO/TS 16949:2016, UNI EN ISO 14001:2015, UNI EN ISO 45001:2018, TISAX, ISO 27001. Bora recently achieved in 2024 also certifications ISO 50001 and ISO 14064 for Environment and Sustainability Governance. Last year (2024) we delivered to our customers more than 45 million pieces and we processed more than 40.000 tons of raw material, with 350 parts numbers in production and 250 employees.

Electrolytic Coating

Located in the Transylvania region and only 35 km to the well connected city of Cluj-Napoca, Electrolytic Coating, company certified IATF16949, currently is supplying high alloy Zn coating (ZnNi) on metal parts, on both technologies, rack and barrel.

Askania

Askania is a leading packaging supplier which offers a wide range of products classified into three main categories:

1. Cardboard and paper packaging;
2. Disposable products;
3. Raw materials from expanded polyethylene.

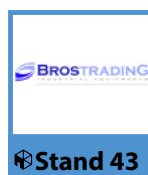

Euro-Locks

Euro-Locks Group specializes in design and manufacture of locking systems for a broad spectrum of industrial customers. Our offer is distinctive for a wide range of products: locks for power market, for the construction market, for metal and wooden furniture, for postal boxes, for automotive market, for safes, for window handles and other. We manufacture IP65 class spanner locks, swing handles, hinges, seals, camlocks, padlocks, mechanical combination locks, electronic locks, safe locks, switches, locks for window handles, barrels for different applications, locking systems for roof boxes and many others. Euro-Locks offers a wide range of products (over 1000 product references), highest quality of manufactured locks, confirmed with ISO9001 and VDS certificates, statutory warranty, stability of cooperation, excellent price-performance ratio, production flexibility, possibility of designing and manufacturing products that meet individual customer's requirements.

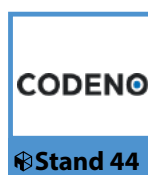

ANFAENGINEERING - ICCO EMT

Euro-Locks Group specializes in design and manufacture of locking systems for a broad spectrum of industrial customers. Our offer is distinctive for a wide range of products: locks for power market, for the construction market, for metal and wooden furniture, for postal boxes, for automotive market, for safes, for window handles and other. We manufacture IP65 class spanner locks, swing handles, hinges, seals, camlocks, padlocks, mechanical combination locks, electronic locks, safe locks, switches, locks for window handles, barrels for different applications, locking systems for roof boxes and many others. Euro-Locks offers a wide range of products (over 1000 product references), highest quality of manufactured locks, confirmed with ISO9001 and VDS certificates, statutory warranty, stability of cooperation, excellent price-performance ratio, production flexibility, possibility of designing and manufacturing products that meet individual customer's requirements.

Bros Trading

For almost 20 years, Bros Trading has been a complete dealer for the supply of equipment for the industrial automation sector. With the desire to offer the most complete service to customers, we sell a diversified portfolio of products, including any type of mechanical, electrical and pneumatic components intended for industrial automation. The main customers are companies that make automation mainly in the automotive field, but not limited to this. We work with companies based in Romania as well as in Europe and outside the EU. Our mission is to respond to the needs of customers in the industrial automation sector by offering a complete service, at 360°, for each personalized need.

Zynk Software

CODENO is the ultimate solution for manufacturing companies seeking to optimize operations, enhance productivity, and achieve industry excellence. With streamlined production processes, data-driven decision-making, and supply chain optimization, CODENO enables businesses to stay ahead in today's competitive landscape. - Advanced Production Planning: Plan, schedule, and optimize production processes. - Manufacturing Execution System (MES): Monitor production in real-time, manage work orders, track inventory, and enforce quality standards. - Production Resource Management: Efficiently allocate manpower, materials, and machinery. - Tool Life Management: Optimize tool lifespan, track usage, and schedule maintenance.

Stand 45-46

Effective Flux

With over 500 customers, from small to very large companies, automotive (T1, T2 or T3 suppliers) and other industries, we are a recognized experienced Consulting, Training and Digitalisation services provider. Digitalisation products are covering : shop floor document digitisation, improving production capacity and quality through digitalisation, quality (poka yoke system based on Augmented Reality) Over 60 consulting projects- capacity increase, Lean, quality improvements were successfully deployed in Europe, mostly at T1 and T2 suppliers. Over 22000 attendees were certified at our training sessions (quality, Problem Solving, Lean, time study, Six Sigma, MS Office) .

Stand 49

Dacia

Dacia is a Romanian car manufacturer founded in 1966, now a subsidiary of the Renault Group. Known for its affordable, reliable, and practical vehicles, Dacia has gained popularity across Europe and beyond. The brand focuses on offering essential features without unnecessary extras, making it an ideal choice for budget-conscious drivers. Combining simplicity with smart engineering, Dacia continues to grow as a trusted automotive brand delivering mobility solutions at competitive prices.

Stand 47-48

SimKron Technologies

SimKron Technologies is a dynamic and innovative company specializing in precision machining, custom engineering solutions, and advanced industrial services. With state-of-the-art CNC equipment, a highly skilled team, and a strong commitment to quality, we deliver reliable products and tailor-made solutions for diverse industries. Our expertise combines mechanical machining, automation, and mechatronics with continuous investment in technology and people. At SimKron, we aim to build long-term partnerships based on trust, professionalism, and performance.

Stand 50

Ford

A global automotive pioneer, Ford combines a rich legacy with cutting-edge modern innovation to offer versatile, high-performance, reliable, and fuel-efficient vehicles. The brand emphasizes uncompromising quality, environmental sustainability, and accessible, inclusive mobility worldwide. With a strong focus on advanced technology, unmatched safety, innovative design, and evolving customer needs, Ford continues to drive progress and deliver smart, efficient mobility solutions for a rapidly changing world.
